

**Hygienic bedding for your herd -  
less moisture, more comfort  
DeLaval DryMaxx™**

# Better hygiene and animal health naturally

**DryMaxx™ is a natural bedding treatment which offers your cows or calves a more hygienic environment. It can be applied in a shed, calving pen, barn or walkway - wherever cows or calves eat, drink, walk and rest.**

DryMaxx™ is made up of diatomaceous earth, which neutralises ammonia on contact by absorbing liquid ammonia present in manure, preventing its release as a gas.

## Less moisture, more comfort

It is a well known fact that high ammonia levels in intensive farming systems can lower the amount of available oxygen for normal respiration, blood circulation and production in livestock.

DryMaxx™ has high moisture absorption and ammonia neutralising properties, to help keep stall surfaces dry and bacteria levels low. This promotes good udder and hoof health.

Reducing moisture in the barn means less bacteria in the environment - reducing bacterial growth means reduced udder and hoof infections.

By controlling ammonia levels and providing dry surfaces, DryMaxx™ can increase cow productivity and comfort through reduced levels of stress, odours, insects and disease.

## Did you know

Each DryMaxx™ particle acts like a sponge to reduce moisture in the environment.

DryMaxx™ can dry back to its original form after being wet.

## Bedding Spreader ▶

Quickly and efficiently maximise your barn and calf pens comfort levels and resting area hygiene with the spreader that evenly distributes DryMaxx™ bedding material to approximately 120 freestalls using a 100 gram/m<sup>2</sup> application and up to 240 freestalls using a 50 gram/m<sup>2</sup> application. The Bedding Spreader runs off a cordless drill (not supplied).

## ◀ DeLaval DryMaxx™ Bedding Treatment

DryMaxx™ has ammonia neutralising properties and a high moisture absorption capacity of 140% compared to its weight. Apply it in the barn or calf pen to help keep surfaces dry, promote better udder and hoof health and higher levels of comfort.

### Pack size

22kg

DryMaxx™ is a very simple solution to improve cow comfort in your barn or calf pen.

### Application

Apply DryMaxx™ initially at a rate of 100g/m<sup>2</sup>. For further applications apply at a rate of 50g/m<sup>2</sup>, once or twice a week or as needed. Use in stalls, barn walkways and resting areas, calf pens, maternity pens, trailers and around water troughs.

DryMaxx™ can also be beneficial for sheep, goats, pigs, horses, poultry and cats, as well as cows!

Natural moisture absorption		
Human Friendly	Skin friendly, non-irritant	Easy to apply - manually or automatically Naturally occurring product
Cow and Calf Friendly	Skin friendly, non-irritant	Natural product that is cow safe Neutral pH to be safe to skin
Environmentally Friendly	Non-reactive, non-corrosive, no harmful by-products	Does not react to give off harmful gases Safe for disposal in waste / manure systems

### DryMaxx™ has unique ingredients

#### Unique features

- Moisture absorption of up to 140% w/w.
- Efficient ammonia absorption.
- A very skin friendly pH of 6.
- Granulated to minimise dust, safe for people and animals.
- Applying DryMaxx™ will also result in a more slip resistant surface.

#### Enjoy the benefits

- Suitable for every barn or calf-shed solution.
- Moisture and ammonia absorption gives a healthier barn environment.
- Reduces fly populations.
- Cost efficient solution reduces housekeeping and treatment costs.
- Hygienic resting places, better atmosphere, healthier cows.
